### **DETAILED ACTION**

#### Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States
- 2. Claims 1, 3, 5 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Tzeng.

Tzeng discloses an in-situ monitoring means for measuring wear of a polishing pad. Tzeng discloses that a way to determine pad thickness is to measure the difference between a point in depression in a polishing pad and a point on a land portion of the polishing pad. Depressions in a polishing pad can take many forms including a groove or hole or perforation through the polishing pad (see Col. 5, lines 40-67 and Col. 6, lines 1-25).

# Allowable Subject Matter

- 3. Claims 2, 4, and 7-13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
- Claim 14 is allowed.

#### Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Cheek et al. discloses a polishing pad with a wear indicator,

Application/Control Number: 09/826,419

Art Unit: 3723

Page 3

Raeder et al. ('661) discloses a polishing pad with a wear indicator, Reader et al. ('137) discloses a polishing pad having an open area which varies with distance from initial pad surface, and Robinson et al. discloses a polishing pad with chemical filled voids used to indicate wear.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David B. Thomas whose telephone number is (703) 308-4250. The examiner can normally be reached on 8:00-6:30 M-TH.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph J. Hail can be reached on (703) 308-2687. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 305-9835 for regular communications and (703) 305-9835 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-1148.
